

## Nordea Summer Trainee Career Areas in 2024

In Summer 2024 Nordea Group Finland will hire hundreds of summer trainees. The application period for Summer Trainee is open from 8<sup>th</sup> of January until 31<sup>st</sup> of January 2024.

### Career Areas

#### Administration / Back office / Support

In administration, back office and support you can work in various tasks supporting the business and their needs. These tasks divide into many of the bank's different business areas and provide a great opportunity to learn more about the banking industry. In these positions you will be working closely with stakeholders in multiple channels, and for these positions we value good team-spirit with a flexible mindset, as well as a self-driven approach to versatile tasks.

These positions are mainly located in Helsinki, Vallila.

#### Credit Management and Analysis

In credit management, you will be working on various credit-related tasks, assisting for example with credit decisions, or in credit analysis. You will be creating added value for customers by finding the most suitable credit decisions for them. For these roles, we especially value an energetic and fearless mindset, as well as a passion for finance and credit.

These positions are located in Helsinki, Vallila.

#### Customer service / Banking advisor

In customer service roles, you will have a front seat for learning the bank's ways of acting. You will be handing personal, tailored and inclusive advisory to a new generation of customers. Join us and help make tomorrow a little better than today - one piece of advice at a time.

In customer service, you will be learning extremely useful communication and sales skills. Don't worry about previous experience, you will succeed with a passion for helping customers and a positive mindset.

There are possibilities in multiple business areas, such as personal banking, business banking and Nordea Finance. We also have more sales minded customer service roles open all around Finland.

Customer service roles have the most open positions and are located all around Finland.

### Insurance / Pensions

Nordea Life provides a great opportunity to challenge yourself in the insurance and pensions area. There are opportunities in the customer service unit and other business functions, such as financial services. You will be working closely with internal and external customers in multiple channels, supporting the business and of course networking and learning about the insurance business.

These roles are located in Kaisaniemi, Helsinki.

### Private banking

In Private banking, you will be helping Nordea to create the best possible service for our premium customers. As a summer trainee in Private banking, you will have various tasks, such supporting with back-office related matters, and preparing customer meetings. For these roles, we value the ability to adjust in a fast and ever-changing environment. Previous working experience from the banking industry is considered an advantage.

These positions are located in Helsinki, Vallila.

### Financial crime prevention

In Financial crime prevention, you will play an extremely important role in fighting financial crime. You will be learning about anti-money laundering, transaction monitoring and reporting, and KYC (know your customer). For these roles, being able to stay composed and organized in a high-pace environment is highly valued. This is a perfect opportunity for someone interested in compliance and financial crime to take their first career steps!

These positions are located all around Finland.

### IT / Technology (IT)

These positions are mainly located in Helsinki (Vallila) and some IT-positions are open in Oulu or Joensuu. English is the only mandatory language skill in IT and Tech units.

#### Software Development

Creating outstanding IT deliveries to customers and bringing the bank into the future by creating a digital powerhouse. Working together with the rest of your multidisciplinary agile product team. You understand practices of reactive, OOP or functional

programming. You are interested in i.e. Java, Javascript, Angular, Typescript or Spring Boot development.

### Requirements and analysis

Grooming deliveries and requirements from business with the team to meet customer expectations and deliver high quality IT solutions. You are collaborative and achieve your expectations through communication and teamwork. You are curious, responsive and can understand the needs of others to ensure delivery of the desired results.

### Quality Assurance and Testing

Quality Assurance capability, consistently assessing and measuring the quality of all software deliveries, through a large degree of automation. You want to perform code reviews and clean coding. You are interested in unit/integration/e2e/accessibility testing tools.

### Engineering System

Setting up development environments, build and deployment jobs, automating the build and deployment processes, coordinating releases and collecting statistics and running analyses.

### Core Technology

Delivering common infrastructure & platforms, conducting application maintenance and providing end-user service and support.
